## ABOUT US

**SHREEJI ENTERPRISE**

We, SHREEJI ENTERPRISE, today run by Shreeji Enterprise, started our operations in Gujarat and since then, our company has turned into a high-quality exporter of Potato, Cumin Seed, Peanut, Cattle Feed as well as Millet. We provide high-quality agriculture products with immense experience in the food industry and global standards at competitive prices to consumers around the world.

Having good relationship with farmers and food entrepreneurs as well as focusing on good service we provide standard and satisfaction to our customers with the latest machinery and innovative methods. We are located in Gujarat (India) which is a leading state in agriculture that enables us fulfilling our commitment to quality.

## OUR TEAM

Our Company has built up its reputation with a highly talented and qualified team that is the backbone of Shreeji Enterprise. Our team of virtuous and professionals team has exceptional managerial skills, vast experience and deep knowledge in the agriculture field.

This team monitors and manages all operations with great care and makes sure to get the order done on time without failing to ensure the reputation of the company. Perhaps their commitment towards the customers has built and sustained a strong and long-lasting relationship with customers across the globe.

## VISION

**SHREEJI ENTERPRISE**

Truly believing in the mantra that everyone has the birthright to get the best, our constant efforts are towards creating and providing the best. We ensure the best not only for our customers but also for farmers, suppliers and our employees.

## MISSION

Don't wait for a miracle but create one. It is our motto and as per it, we believe quality is not a miracle but it needs efforts. Our motto is reflecting in the growth of the company. We offer to our customers the highest quality products and excellent service beyond what they have ever expected and that has given us a lot of satisfied customers around the world.

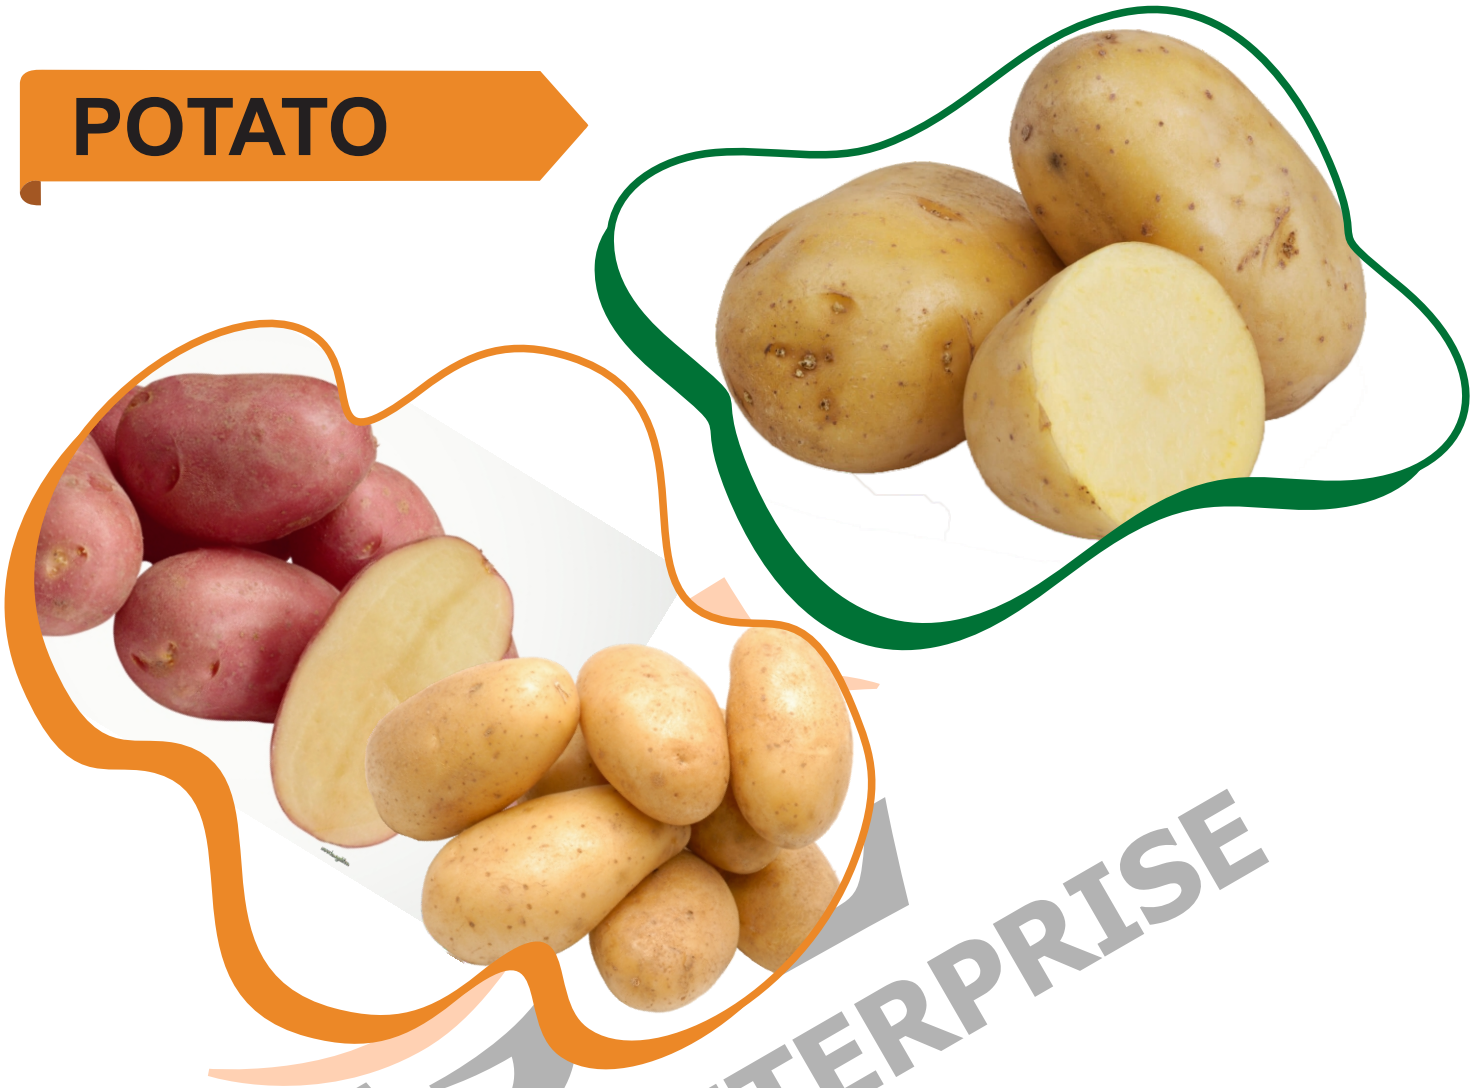

## QUALITY

We at Shreeji Enterprise are always conscious about the quality. Our professional team of Agri experts uses the latest technology in the fields. They teach our farmers how to grow and improve and closely monitor the product from various stages of growth to the packaging. We provide techno-managerial support to our farmers since farming to ensure the quality.

We get packing at an approved pack house with hygienic packing material as per export standards. We get our products tested in recognized laboratories to meet international quality standards.

# POTATO

Potato plants are herbaceous perennials that grow almost high. Its height depends on variety. It has small leaves. Its flowers are white, pink, red, blue, or purple. Its origin is almost 300 years back.

Potato has got place in the list of the main food crop in India. Only a few vegetables are as popular as Potato.

India is the second largest potato exporter in the world and as per data Potato export of India is raising with each passing year. In India, potatoes are mostly cultivated in UP, Bihar and Gujarat. We are situated in Gujarat that is major benefit of our geographical location. We are also strong in **LR Potatoes** (Lady Rosseta).

# PEANUT

Peanut is a shrubby and erect plant with branches varies from high to short. Peanut, a legume crop, is originally native to American but many centuries ago it was introduced to rest of the world. It is widely cultivated for the oil content. Apart from it, peanut is said to be one of the most used edible oil in the world.

Peanut provide vitamin E and Vitamin B as well as dietary fibers, dietary minerals, manganese, magnesium and phosphorus.
